

ACRYLITE® extruded

Infrared Transmitting (IRT) acrylic sheet

Product

ACRYLITE® Infrared Transmitting (IRT) sheet is specifically formulated for projects requiring ultraviolet (UV) and visible light blockage while allowing infrared (IR) transmission. ACRYLITE® IRT sheet is designed to transmit infrared light but to absorb visible light. It is ideal for use in applications where it is desirable to conceal infrared security cameras or infrared transmitters and receivers. ACRYLITE® IRT sheet is available in continuously manufactured (extruded black 9M020) grades. The physical properties and fabrication techniques of this product are the same as standard ACRYLITE® extruded sheet

Product Offering

Color	Sheet Size	Thickness
Black 9M020	48x96	118", .177" and .236"

This information and all further technical advice is based on our present knowledge and experience. However, it implies no liability or other legal responsibility on our part, including with regard to existing third party intellectual property rights, especially patent rights. In particular, no warranty, whether expressed or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technical progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of a customer. Reference to trade names used by other companies is neither a recommendation, nor does it imply that similar products should be used.
