Subject: Report of Flammability

This document confirms that the **CHEMCAST®** general purpose acrylic sheet, clear, is in agreement with the following norms: ASTM D635-06 Standard Test Method for Rate of Burning and/or Extent and Time of Burning of Plastics in a Horizontal Position and UL 94, Test for Flammability of Plastic Materials for Parts in Devices and Appliances. After internally making the corresponding tests, we concluded that the material is classified like HB.

This result is only a notification of the obtained findings and it does not constitute a product certificate.

Sincerely yours,
Plastiglas de México
