

Flame Retardant & Resistant to Chemicals

Technical

Fabrication

Komadur

Technical Information

KOMADUR type I commercial pvc sheets meet the most specific demands for the chemical, building and electrical engineering industries. They are easy-to-use and offer a high level of efficiency with which the sheets can be worked.

These PVC commercial sheets are also flame-retardant and resistant to chemicals and corrosion in line with DIN 8061.

Test Data

Komadur Sheet Sizes

TYPE I Komadı	ır Gray				
Product	Thickne	SS	Weight	Skid	Stock
Code	mm	inches	Per Sheet	Qty	Size
3155	3	1/8	27	75	4 x 8
3156	5	3/16	49	60	4 x 8
3165	6	1/4	55	50	4 x 8
3143	10	3/8	92	30	4x8
3184	12	1/2	137	20	4x8
3146	19	3/4	217	10	4x8

There are no toxic or harmful substances in KOMADUR that can be given off over the long term. KOMADUR is free from formaldehyde, asbestos, lindane, PCB, PCP and CFCs. What's more, it is cadmium and lead-free and is also made without any monomers, biocides and plasticisers.

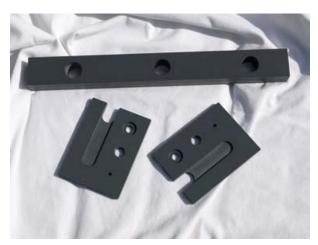

KOMADUR poses absolutely no hazard to people or the environment, neither during its manufacture, while in use, or during the recycling process. Old sheets no longer in use or

left-over sections of sheets can be recycled without any problem: they are ground up in shredders and cutting machines before being returned to the production process to make new sheets. This closed material cycle is not only economical, but ecological, too.

Certified to DIN ISO 9001 - "Uncompromising quality from start to finish"

Systematic research and development work and decades of experience with plastics are the basis for the generally recognized high quality of our products. We carry out tests at all stages – starting with the raw materials on delivery through to final inspection of the finished products.

Regular examinations and analyses conducted by independent testing institutes confirm the high degree of care we take during the production process. Our quality assurance system is certified to DIN ISO 9001.
