## Custom Acrylic Rods

While we stock standard lengths in most of our acrylic rods, any of our products can be cut to meet your specifications. We also have machining and fabrication capabilities to customize our products to your needs. Typical operations include flame polishing, angle cutting, drilling, chamfering, and specialty machining.

Custom dimensions and special packaging needs can also be accommodated (subject to certain volume requirements).

For more information or to find a distributor in your area, please call us at 800-882-4401 or fill out our [Information Request Form](#).
