

## Overview

SUNLITE's cellular polycarbonate structure yields a lightweight sheet with high impact strength and superior thermal insulation. High light transmission makes SUNLITE ideal for varied roofing, wall cladding and plazing applications.

SUNLITE has a wide product range from anti-condensation treatment for greenhouses and garder centers to SolarSmart™ sheets that create cool climatic conditions.

Interior designers and advertiser: take advantage of SUNLITE's specia appearance and add a unique touch to their designs.

### Main Benefits

- High thermal insulation
- Lightweight and impact resistant
- High light transmission
- Excellent structural durability
- Weather and UV resistance
- Blocks virtually all UV radiation
- Easy to handle and install
- High fire performance rating

## **Typical Applications**

- Architectural roofing and glazing
- Skylights and sidelights
- Conservatories
- Covered walkways
- Displays, signage and decorations
- Industrial roofing and glazing
- Residential roofing and glazing
- Covered swimming pools
- Agricultural greenhouses

## **SUNLITE® Product Range**

	Product	Description							
	SUNLITE®	Standard sheet with UV protection on one side							
	SUNLITE® UV2	UV protection on both sides							
	SUNLITE® ML	Multi-layered color combinations for special designs							
	SUNLITE® Plus	With anti-condensation, for greenhouses							
	SUNLITE® FR	Fire retardant, with better flammability retings							
	SUNLITE® Solar Control	Solar metallic reflective heat blocking sheet.							
ar * Control lecthology	SUNLITE® SLT	Heat blocking and anti-condensation for garden centers.							
	SUNLITE® CL	Heat blocking sheet for architectural applications							
elective solar	SUNLITE® Smart	See-through sheet with advanced heat-blocking.
